

The Control and Protection Act 2018 allows us in ensuring that animals are treated as humanely as possible while under human control.

Good animal welfare requires disease prevention and appropriate veterinary care, shelter, management and nutrition, a stimulating and safe environment and humane handling. We would like to change the old principles of our nation and introduce a new perspective showcasing that all living sentient beings should be treated with respect and love.

We are promoting responsible ownership for it will help to reduce the outcry of increased stray population in our country.
